

LEBANESE ARMY SUSTAINABLE ENERGY AND WATER CONSERVATION WORKSHOP

CEDRO ORGANIZED A 5-DAY ARMY WORKSHOP

As part of its capacity building activity, the EU funded UNDP-CEDRO project designed a 5-day workshop targeting the engineering, architecture and procurement departments of the Lebanese Armed Forces (LAF). The workshop aimed at providing the attendees with theoretical and practical information on sustainable design for the improvement of engineering and architectural practices and the work processes to ensure more sustainable use of resources. LGBC was selected to develop and deliver the workshop which started on November 12th 2015 at the LAF Directorate of Engineering department in Kfarshima.

IPT ENERGY AWARENESS AWARD COMPETITION

The EAA is an award program launched by the UNDP and IPTec to recognize efforts put forth by institutions and organizations in both the public and private sectors in reducing their energy footprint and integrating sustainable practices within their fields.

LEBANON'S OWN RENEWABLE ENERGY GRID CODE

Work is underway for developing Lebanon's first Renewable Energy Grid Code where national and international consultants teamed up under the management and supervision of UNDP CEDRO, UNDP DREG, and the LCEC. The project team is currently working on assessing and analyzing the collected and measured data from Lebanon's grid and the grid code will be finalized by the end of March 2016.
