

CEDRO AT THE PARLIAMENT

A parliamentary session was held in the presence of members of parliament that are part of the Public Works, Energy and Water, and Transportation Committee, along with various stakeholders from the Energy sector (EDL, UNDP, Ministries' representatives, etc...). The session discussed the opportunities and challenges of large-scale renewable energy integration in Lebanon.

STRATEGIC NICHE MANAGEMENT OF THE SOLAR ELECTRICITY SECTOR IN LEBANON

Strategic Niche Management, a tool to support the societal introduction of radical sustainable innovations, has been developed for the electricity sector in Lebanon. In particular for the solar electricity technology; the author compares the opportunities and drawbacks with those of similar background setting in developing countries.

ENERGY MANAGEMENT IN THE LEBANESE INDUSTRIAL SECTOR WORKSHOP

The EU funded UNDP CEDRO project is organizing a two – day workshop on the “Energy Management in the Lebanese Industrial Sector”. The two-day workshop dedicated for industries will feature presentations from local and international experts on energy efficiency, hybrid solar implementation, and solar heat processing for the Lebanese Industrial Sector. Interventions from beneficiaries of hybrid systems will discuss their experience. Industrialists are encouraged to attend!
