

ENERGY MANAGEMENT IN THE LEBANESE INDUSTRIAL SECTOR

The EU funded UNDP CEDRO held a two day technical workshop under the patronage of the Minister of Industry, the Minister of Energy and Water, and in the presence of the Ambassador of the European Union Delegation to Lebanon, the UNDP Resident Representative, of the President of the Association of Lebanese Industrialists and the Director General of the Industrial Research Institute. The workshop presented industrialists with opportunities to save on energy consumption and re-using wasted energy, hence reducing energy costs. Presentations are available online.

AUB INAUGURATION

Under the patronage of the Minister of Agriculture and in the presence of Minister Counsellor, Head of the Sustainable Development Section at the Delegation of the European Union to Lebanon, the UNDP Assistant Resident Representative, the AUB president and other stakeholders, the first of four MedSolar sites was inaugurated. The 150KWp solar system will allow the engineering building to reduce its dependence on the campus' power station.

ENERGY EFFICIENCY IN THE LEBANESE INDUSTRIAL SECTOR

App. 30% of the production costs could be attributed to energy production costs. In a highly competitive market, only facilities able to cut on their unit costs are able to maintain a strong position, therefore, considering and implementing energy efficiency measures is as important as product quality and the supply chain. This present report identifies such opportunities tailor made to the Lebanese market, along with costs, and payback periods.
