DFID TO POWER DINNIYEH

The ongoing host communities' project has been replenished thanks to the Department for International Development (DFID) of the UK. The project, aims at providing the relatively more vulnerable Lebanese citizens of the Dinniyeh region in the North of Lebanon in the Lebanese impacted by the Syrian crisis with small solar home kits that would power up to 6 light bulbs and a phone charger and with solar street lighting for the regions municipalities.

+ OFF-GRID SOLAR HOME SYSTEMS AS PART OF RURAL ELECTRIFICATION IN LEBANON

This month's technical exchange provides information on the off-grid solar home systems installed as part of the host communities' initiative in areas hosting Syrian refugees, namely the Bekaa and the North of Lebanon. Ms. Beucler provides a literature review of the available systems, their importance and the suggested technical variations to meet the most basic needs of the end users. Finally a brief overview of the end user satisfaction is provided based on collected data from the project's beneficiaries.

BIOMASS FROM SUSTAINABLE FORESTRY WORKSHOP

A 1 day biomass from sustainable forestry program is scheduled for the 23rd of November. The workshop is focused on the methods that should be used to harvest forestry residues in a sustainable manner for the use as biomass. An additional guideline on the biomass briquetting process is provided. The workshop is open only to heads of municipalities that have forests within their vicinity and within their management and/or organizations and institutions involved in forestry management and biomass energy supply. We apologize beforehand for any request to join this workshop that is not in line with the above criteria.
