

NET METERING WORKSHOP

The EU funded UNDP CEDRO project has organized a 2-hour workshop detailing the net – metering guidelines in the case of Lebanon. The workshop aimed for EDL employees presented the system’s components, the standards to follow and the effect of the PV system on the grid. The presentation touched on the system specifications and requirements to be connected to the net – metering scheme. A case study was presented along with detailed specifications and drawings from one of the projects implemented at CEDRO. For more information please check the website for the presentation and publication.

USEK IMPLEMENTATION IS UNDERWAY!

The installation of the 802 PV panels of 265 Wp each at USEK in Kaslik has been completed on all roofs (total of 4 roofs). The implementation is set to provide 212.5 kWp of clean energy to the campus, complimenting the campus’s plan to go green.

NET METERING REPORT

As part of the EU funded UNDP CEDRO project capacity building tasks a net metering guideline report has been developed. The report provided a detailed description of the PV system, with an overview of its components, the standards to follow, the testing protocol and the commissioning and operation of such utilities.
